

VINAYAK SANTOSH PAWATE

Full-Stack Developer • Software Engineer • Data Analytics

Pune, Maharashtra | vinayakpawate@zohomail.in | <https://www.linkedin.com/in/vinayak-pawate/> | <https://github.com/Vinayak1806/>

PROFESSIONAL SUMMARY

Computer Engineering undergraduate pursuing a B.E. with First Class Distinction in Diploma Engineering, with hands-on experience building full-stack web applications using MERN and Next.js. Skilled in developing frontend interfaces, backend APIs, database-driven applications, and data pipelines. Currently working as a Full-Stack Development Intern, contributing to production features in a live codebase, with prior experience in Python, SQL, EDA, predictive modeling, and Power BI. Seeking Full-Stack Development, Software Engineering, or Data Analytics opportunities.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, SQL

Full-Stack: React.js, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, Prisma, REST APIs, Tailwind CSS

Data & Analytics: Pandas, NumPy, Scikit-learn, EDA, Feature Engineering, Statistical Analysis, Power BI, Matplotlib, Seaborn

Tools: Git, GitHub, Vercel, Render, Sentry, Jupyter Notebook, Linux

EXPERIENCE

Full-Stack Development (MERN) Intern — HSR Hi-Tech Solutions

Jul 2026 – Present, Remote

- Building full-stack features across frontend, backend APIs, and databases under mentor guidance, working with React.js and Node.js/Express.js on feature development, debugging, and API integration in a live production codebase.

Data Analytics Intern — Codec Technologies India

Jan 2026 – Feb 2026, Remote

- Built end-to-end data preprocessing pipelines (Python, Pandas, NumPy), reducing data inconsistencies by 30% and improving downstream analysis quality.
- Developed Power BI dashboards across 5+ KPIs; applied EDA and statistical profiling to uncover trends and support predictive modeling workflows.

Data Analytics Intern — Excellent Software Services Pvt. Ltd.

Jun 2024 – Jul 2024, Remote

- Analyzed 10,000+ employee records (Python, SQL) to identify attrition patterns, delivering actionable retention insights to HR stakeholders.
- Automated monthly reporting via Python scripting, reducing manual effort by 40%, and built reusable preprocessing workflows.

PROJECTS

Admission Compass — Full-Stack Data Platform

2026

Next.js, PostgreSQL, Prisma, Python (ETL), Tailwind CSS

- Built a Maharashtra FE/DSE college-cutoff prediction platform; a Python/pandas/pdfplumber pipeline extracts official CAP PDF data into PostgreSQL, powering admission-probability zones and a CAP preference-list builder.

Live: <https://admission-compass.onrender.com/>

Hostel Hub — Full-Stack MERN Application

2026

React, Node.js, Express.js, MongoDB, JWT

- Built a full hostel management platform with JWT auth, admission workflows, room allocation, fee tracking, attendance, and admin dashboards.

Live: <https://hostelhub-xi.vercel.app/>

ArguAI — AI-Powered Debate Platform

2025

React.js, Node.js/Flask, MongoDB/MySQL, Gemini 2.5 Flash API

- Built and deployed a real-time AI debate platform integrating Gemini 2.5 Flash across 600+ topics, with a performance-tracking analytics dashboard and skill progression system.

Live: <https://arguai-mocha.vercel.app/login/>

Heart Disease Prediction & Employee Attrition Analysis

2024

Python, Pandas, Scikit-learn, Power BI

- Trained classifiers (Logistic Regression, Decision Tree, Random Forest) on the UCI Heart Disease dataset, achieving 87%+ accuracy; separately processed 1,400+ HR records to surface the top 8 attrition drivers via EDA and feature engineering.

EDUCATION

B.E. Computer Engineering — Sinhgad Academy of Engineering (SAE), Pune

Aug 2025 – Present

- CGPA: 9.07/10

Diploma in Computer Engineering — Vidya Pratishthan's Polytechnic, Indapur

Sep 2022 – May 2025

- First Class Distinction (88.17%) | DSA, Statistics, DBMS, OOP, Discrete Mathematics, Computer Networks
